ABDUL SALAM GHANGHRO

JUNIOR FULL-STACK WEB DEVELOPER (REACT / NODE.JS)

Karachi, Pakistan | +92-317-3588947 | abdulsalamgh@outlook.com
LinkedIn: linkedin.com/in/abdul-salam-ghanghro-6ab797207/ | GitHub: github.com/abdulsalam2121

PROFESSIONAL SUMMARY

Full-Stack Web Developer (BSCS Graduate, Sukkur IBA University, 2025) with proven experience building deployed, production-grade Web Applications including CoverCell (phone insurance platform) and LoyaltyPro (QR cashback loyalty platform). Demonstrated track record of accelerating page speeds (1.5s boost), engineering multi-tier loyalty automation systems driving 40% retention, and developing algorithm benchmark software with 95%+ accuracy. Experienced in teaching DSA online and freelancing React/Node solutions. Seeking a remote Junior Full-Stack Developer position.

CORE SKILLS & TECHNOLOGIES

- **Languages:** JavaScript (ES6+), Python, C/C++, Java, HTML5, CSS3
- **Frontend & UI:** React.js, Tailwind CSS, Responsive Web Design, Component Architecture
- **Backend & Databases:** Node.js, Express.js, RESTful APIs, Firebase, MongoDB
- **Tools & Workflows:** Git, GitHub, VS Code, Jupyter, GitHub Copilot, ChatGPT, Docker
- **CS Concepts:** Data Structures & Algorithms (DSA), Dynamic Programming, Complexity Analysis

WORK EXPERIENCE

Freelance Software Developer | *Remote* **2024 – Present**

- Architected and delivered custom React.js and Node.js web applications for 5+ client projects via Fiverr with a 100% on-time completion record.
- Integrated AI copilots into development workflows, accelerating prototyping time by ~35% while ensuring robust, high-quality, and reviewed codebases.
- Collaborated directly with clients to translate project requirements into modular front-end interfaces and secure RESTful backend APIs.

Online Computer Science Tutor – Algorithms | *Remote* **2024**

- Conducted 1:1 online coaching sessions covering advanced topics including Dynamic Programming, Greedy Algorithms, and Recurrence Relations for a 16-week curriculum.
- Created 20+ original algorithmic practice problems with fully worked solutions, improving student exam performance by ~15%.

FEATURED DEPLOYED PROJECTS

LoyaltyPro – QR Cashback & Loyalty System | *React.js, Node.js, Express* **loyalty-qr.com**

- Architected and launched a production-ready QR-based cashback platform (Live at loyalty-qr.com) providing automated reward management, real-time balance checks, and transaction auditing.
- Engineered a multi-tier loyalty engine (Silver, Gold, Platinum) with dynamic cashback rate calculations, driving up to 40% increase in customer retention during client pilot runs.
- Implemented a dedicated Customer Portal allowing users to scan unique QR codes, track earning history, and view instant balance updates.

CoverCell – Mobile Insurance Protection Platform | *React.js, REST API, Tailwind CSS* **cover-cell.com**

- Developed and deployed an end-to-end device protection web platform (Live at cover-cell.com) featuring instant model-based pricing and multi-plan policy configuration.
- Optimized front-end state management and asset delivery across 200+ device record queries, cutting average page load times by 1.5 seconds.
- Integrated dynamic pricing calculators and optional add-on checkout flows (express replacement, accessory coverage) with responsive UI design.

Automated Benchmark Software for Asymptotic Analysis (FYP) **github.com/abdulsalam2121/FYP-Benchmark**

| React, Node, Firebase, D3.js

- Engineered a full-stack web app analyzing C++/Java code to automatically determine time/space complexity with ≥95% accuracy and ≤3.2s response time.
- Integrated D3.js data visualizations and exportable PDF/TXT complexity reports, actively utilized by 20+ university students for coursework.

Delight Hub Platform *| React.js, CSS Modules, JavaScript* **github.com/abdulsalam2121/Delight-Hub**

- Developed a multi-module e-commerce/service React application supporting 5+ product categories with 45+ reusable UI components.
- Optimized asset delivery and bundle sizes, boosting Google Lighthouse performance score by 25 points.

EDUCATION

BS in Computer Science *| Sukkur IBA University, Pakistan* **2021 – 2025**

Relevant Coursework: Data Structures & Algorithms, Web Engineering, Database Systems, Operating Systems, Artificial Intelligence, Machine Learning.

LANGUAGES & INTERESTS

Languages: English (Professional Working), Urdu (Native), Sindhi (Native)

Interests: EdTech Platforms, AI-Assisted Software Development, Modern Web Performance Optimization
